BETA2

Beta 2 chairs are ergonomically designed task chairs that employ 50 mm thick fire retardant moulded foams to provide you excellent seating comfort. Additional lumbar support can be obtained from our optional adjustable kidney-shaped support for better seating posture.

Several choices of seat controls can be installed. From a simple butterfly plate normal tilt for the economically conscious customer to higher performance mechanisms such as knee tilt or permanent contact mechanisms. The armrests have several options too, a fix T or ring arms, height adjustable arms or full articulating armrests.

For your upholstery requirements, mesh is a popular choice; however the backrests can be upholstered in most fabrics, similarly for the seats to allow the Beta 2 to blend into your design requirements.

Beta 2 chairs can be installed on sled bases when less mobility of the chairs are preferred.
